

A message to the wholesaler

The Water Shop Australia was established nearly 30 years ago by Mr Vincent Russell, one of the founding fathers of the Australian Health Food Industry and winner of many awards for his progressive innovations.

When fluoride was first added to our water supply, Vincent Russell became more aware of the growing demand of water purifications and filtration products. In response to this need, he designed and commercialized Australia's first home water filter in the 1970's.

Recognizing the emerging market and need for the state of the art water purification technologies along with affordable high quality water filtration products, The Water Shop was founded in the 1980's and has evolved from a pioneering vision into one of Australia's largest independent water filtration importer/exporter/retailer and wholesaler.

Every year we attend at least 2 of the world's largest water purifications trade fairs and conventions, keeping abreast of the latest filtration technologies and products available from around the world.

The Water Shop is an ISO 9002 approved company and a member of the Water Quality Association.

It is our pleasure to present you with our latest updated wholesale catalogue which provides a comprehensive and easy to utilise list of wholesale products. We sincerely hope the wide range of products we have available will allow you to provide many different options to fulfill your customers needs.

Thank you for your custom,

The Water Shop Team

String Wound Filter Cartridges

Applications:

Plating Solutions, Pre RO, Chemicals, Petrochemical Process, Food & Beverage, Electronics

Features & Benefits:

- Continuous strand winding process provides consistent performances of high dirt holding capacity, long service and high flow rate.
- Numerous filter media provide excellent chemical compatibility for different applications.
- No odour, no foaming and no media migration.
- Computer programming capability optimizes the filter cartridge geometrically and maximizes the use of surface area.

Specifications

Model No.	FWC-LL-WX-ZZZ		
Filter Media	Polypropylene, Bleached Cotton	Core Material	Polypropylene
Filter Length	10", 20", 30", 40"	Inside Diameter	1.1" (28mm)
Micron Ratings	1, 5, 10, 25, 50, 100µm	Outside Diameter	2.5" (63mm), 4.5" (114mm)

ARAGON - PLUS FILTER CARTRIDGE

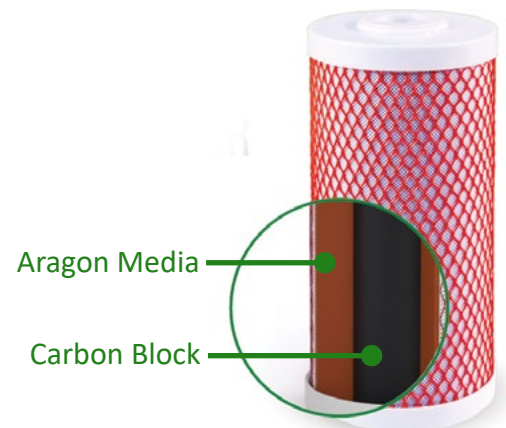

This unique cartridge is created using the innovative, patented **Aragon Media**. It has been extensively tested by various Certified Laboratories in Europe, to effectively remove chemicals, pesticides, bacteria and heavy metals as well as sediment down to >2 microns.

Developed in Europe, the new SGS-polymers material for water purification combines 3 types of filtration: mechanical, sorption and ion-exchange, making this filter the best to date at removing the widest range of contaminants. The high quality extruded carbon block cartridge is equally effective at purifying **both potable and non-potable water**.

How does it work?

Mechanical impurities are filtered out through the surface layers with extremely high accuracy.

SGS-polymers have shown the best results in the complex removal of harmful impurities. Elements and compounds including heavy metals and radioactive materials are removed through ion-exchange and sorption mechanisms.

Filtration Efficiency %

Particles >2 microns	99.999%
Lead, zinc, cadmium, cesium	95%
Chlorine	100%
Chloramines	>90% +
Pesticides	92%
Iron	90%
Aluminium	97%
Turbidity	99%
Oil Products	90%

Specifications

Max Flow Rate	
10" x 2.5"	2.5 litres p/m
10" x 4.5" BB	25 litres p/m
20" x 4.5" BB	50 litres p/m
Water Temperature	
+4°C to +75°C	
Filter Life	
10" x 2.5"	7 000 litres
10" x 4.5" BB	30 000 litres
20" x 4.5" BB	60 000 litres

Omnipure Filter Company **The Best Inline Water Filters In the World**

The Water Shop is the authorised Australian distributor for Omnipure USA

About Omnipure

In 1970 Omnipure Filter Company revolutionized the filtration industry by making the first small, disposable, inline carbon filter. Each and every filter since, was designed to remove or reduce water contaminants, with the simple concept of producing “better tasting water”.

At the start, Omnipure filters were used primarily on water coolers and ice makers. As the market has developed, products have found their way into many more applications including commercial beverage equipment, under-the-sink and on-the-counter residential units and drinking fountains. They are also widely used as components in commercial and residential purification systems such as reverse osmosis units. Today, you will find Omnipure filters utilized in virtually any situation where better tasting water is important.

Engineers, quality control experts, and production supervisors test and retest new and existing designs and materials to make sure that our products perform to specifications.

Every filter design is submitted to NSF for independent verification of product performance. NSF conducts a battery of tests conforming to industry norms and standards.

Samples from every phase of production are randomly collected for quality assurance evaluation. These samples are literally torn apart and tested in the Omnipure laboratory to ensure that they meet stringent guidelines.

These measures are just a few examples of the many steps taken to ensure results. When an Omnipure filter reaches the end of the production line and is readied for shipment, you can be assured that the product will perform as promised.

Code & Media Guide

All filter cartridges within the range of Omnipure Series' carry a unique model code. This code identifies the **Series**, **Dimensions** and **Media/Micron Rating**.

MODEL CODE EXAMPLE

K 2 5 2 0

Series

The first letter(s) of the code identifies the Series Type.

Available series include:

- OMB Series**
- OCB Series**
- K Series**
- Q Series**
- L Series**
- ELF Series**
- CK Series**
- CELF Series**
- E Series**

Dimensions

The first digit identifies the diameter and the second digit the length.

To calculate the dimensions:

First Digit	=	Diameter
2	=	2"
5	=	2.5"

To identify the cartridge length simply double the value of the second digit.

Second Digit	=	Length
3	=	6"
4	=	8"
5	=	10"

Media/Micron Rating

The last two digits identify the media/micron rating.

Available medias include:

- 01 Sediment 1 Mic**
- 05 Sediment 5 Mic**
- 15 Heavy Metals 1 Mic**
- 20 Carbon Block 1 Mic**
- 21 Carbon Block 10 Mic**
- 40 GAC 5 Micron**
- 50 Customized Media**
- 55 Ion Exchange**
- 66 Fluoride**
- 67 KDF**
- 85 100% Phosphate**
- 86 GAC/Phosphate**

DOULTON CERAMIC FILTERS

Doulton® has been committed to providing the finest natural drinking water filters since 1826 and to this day proud to be an eco-friendly manufacturer with multiple industry certifications and recognised by the highest international quality standards. Made in Great Britain, Doulton® ceramic water filters are convenient, versatile and economical, derived from naturally occurring raw materials.

Doulton® water filter systems offer a highly efficient way to remove chemicals such as chlorine and fluoride that are added during water treatment stages. Any heavy metals, pathogenic bacteria and cysts that may have penetrated the water are also removed. In fact, it's proven that 99.99%+ of these nasties are eliminated for good and all that remains is a more natural and healthier filtered water supply to drink and prepare your food with – at home, outdoors or on the move.

The Doulton® range is trusted by millions. Every ceramic filter candle carries a unique authenticity code and every filter housing has a warranty to ensure product legitimacy.

DOULTON STERASYL

Sterasyl®

Made in UK

Features:

- Fits industry standard 10" filter housings.
- Filtration efficiency of 100% at 0.9 micron
- Filtration efficiency of >98% at 0.2 micron
- Highly efficient bacteriological filtration with >90% efficiency at 0.05 micron
- Tested with live Cryptosporidium to a removal efficiency 100%
- Ideal for RO guard and post filtration
- Complimentary to UV systems

REVERSE OSMOSIS

COMPLETE REVERSE OSMOSIS SYSTEM

Countertop Reverse Osmosis

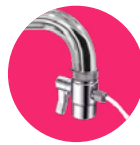

Our countertop Reverse Osmosis systems remove all contaminants that are of concern to the consumer- such as chlorine, dissolved solids, fluoride, bacteria, parasites, viruses, inorganic chemicals, pesticides and heavy metals. These impurities are flushed down the drain rather than collected in the filters- preventing any build up.

The system is hand built and tested in Australia and has been made using high quality components, filters and parts.

'Twist-Off' cartridges

Ensures a simple, hygienic, no mess means of system maintenance.

No mains plumbing required

Simply attaches to your existing kitchen faucet/aerator using the included fittings.

COUNTERTOP REVERSE OSMOSIS (RO3000)

COMPLETE REVERSE OSMOSIS SYSTEM

Countertop Reverse Osmosis with AlkaHydrate Filter

The additional Alkahydrate filter will provide you with enhanced water that is mineralised, energised, has low ORP, raises the pH to a desirable alkaline level and has an ideal absorption rate.

- ◆ **Raise pH** - the AlkaHydrate Filter is ideal for those who are looking to reduce acidic toxic waste in the blood, tissues, and fluids of the body and thus adhere to the more alkaline state required by most human metabolic processes.
- ◆ **Low Oxidation Reduction** - any substance that oxidises essentially disintegrates. Water or a media with a negative ORP has the ability to decrease the oxidation, or prolong the life, of another substance or body. The AlkaHydrate filter significantly increases the negative ORP thus enabling it to decrease the oxidation of substances (our body in particular) therefore being a potent anti-oxidant.
- ◆ **Add Ionic Organic Natural Minerals**

COMPLETE REVERSE OSMOSIS SYSTEMS

Undersink Reverse Osmosis with AlkaHydrate Filter

- ◆ **Raise pH** - the AlkaHydrate Filter is ideal for those who are looking to reduce acidic toxic waste in the blood, tissues, and fluids of the body and thus adhere to the more alkaline state required by most human metabolic processes.
- ◆ **Low Oxidation Reduction** - any substance that oxidises essentially disintegrates. Water or a media with a negative ORP has the ability to decrease the oxidation, or prolong the life, of another substance or body. The AlkaHydrate filter significantly increases the negative ORP thus enabling it to decrease the oxidation of substances (our body in particular) therefore being a potent anti-oxidant.
- ◆ **Add Ionic Organic Natural Minerals**

REVERSE OSMOSIS TANKS

Our Reverse Osmosis Tanks are constructed using the finest FDA Approved material available.

The water storage chamber is assembled using a virgin polypropylene liner, high grade Chlorobutyl Diaphragm and patented stainless steel water connection. In addition, every diaphragm is post cured prior to construction ensuring tasteless, odourless, pure water.

Structural Integrity

Deep drawn steel domes and precision weld seams give our Reverse Osmosis Tanks unparalleled quality. All tanks are quality tested at multiple stages in the production process to ensure the structural integrity. All tanks are built with sealed brass air valves and O-ring sealed air valve caps to ensure leak-free air chambers which eliminates the need to check pre-charged air pressure resulting in on-going low maintenance!

DOULTON STAINLESS STEEL FILTER SYSTEM

COMPLETE GRAVITY SYSTEM 260mm W x 490mm H

Item Code	Description	Unit Per Carton
IT004141	SS Gravity Filter & 2 Super Sterasyl®	1

Discover Doulton Gravity Fed

The Doulton® gravity fed water filter consists of two containers; the upper container is filled manually with untreated water, which then filters into the lower container, passing through a number of ceramic candles that remove impurities.

Whether in the garden at home or camping with the family, the Doulton® freestanding, portable gravity water purifier allows you to take Doulton® quality, healthy drinking water with you, wherever you go.

Whilst removing contaminants, Doulton® gravity water filters retain all of the natural, healthy minerals in your water, so you can trust that the whole family are getting the very best health benefits from drinking water. Doulton® water filters are trusted by millions of families worldwide to provide clean, healthy, great-tasting water into their homes.

- ◆ Complete with 2 x 7" Super Sterasyl® Candles
- ◆ Compact, portable and easy to operate
- ◆ No mains water supply needed
- ◆ Long-life filter candles can be cleaned and reused for extended use
- ◆ Proven protection against water-borne disease
- ◆ Accommodated 2, 3 or 4 ceramic filter candles depending on water quality and fill rates
- ◆ Removes >99.99% of common water contaminants and filters out bacteria, cysts and particles from drinking water

COMPLETE TRIPLE BIG BLUE SYSTEM

Big Blue High Flow Whole House System with Ion Exchange

Our Big Blue systems are specifically designed to cater to areas where a high flow rate is needed, for example an entire house, industrial area or commercial zone. Installed on mains plumbing, water is filtered and supplied to all faucets/outlets throughout the premises protecting tap washers, water systems and appliances.

Made in the USA

Pressure Gauges

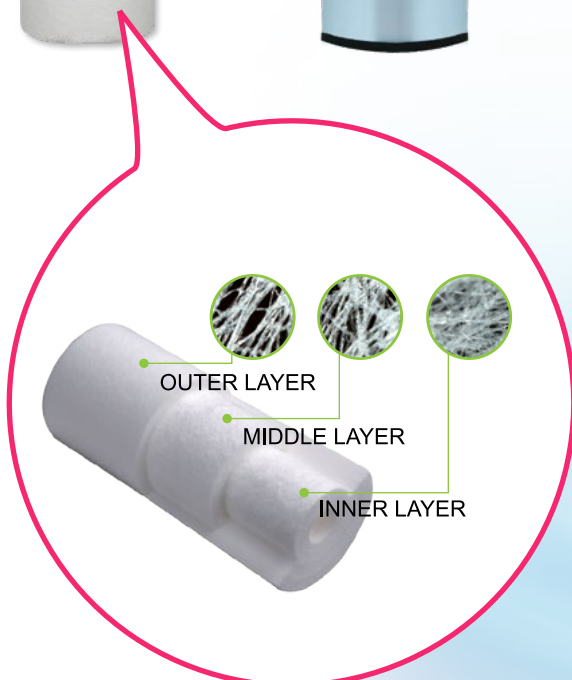

Stainless steel, liquid filled

Wall Bracket

Stainless steel manufacture

- 
 Designed for deionizing water up to 16 megaohms.
- 
 Max flow rate of 10 litres per minute.
- 
 Ideal for: pharmaceutical use, cosmetics, power generating medical/laboratory equipment, dental and aquarium use.

Unique, 3-Stage Polypun Filter Cartridge

Filter Stages

- 1 Polyspun 1 Micron Sediment Pre-Filter**
 3 stage gradient filtration - 10, 5, 1 micron

SPRITE SHOWERS... YOU CAN FEEL THE DIFFERENCE!

We are proudly the Australian distributor for Sprite shower filters. Sprite Industries are the innovators of shower filters and are known to be the world's finest, enabling everybody to enjoy chlorine free showers the world over.

Chlorine is universally used to chemically disinfect water and is added to your water to destroy germs, bacteria and living organisms. You are also a living organism and your body is negatively affected by chlorine internally as well as externally.

- 💧 pH balanced
- 💧 Simply attach to your existing shower fittings
- 💧 Makes hair softer and is ideal for those who suffer from allergies, dandruff and dry, sensitive skin.

FITTING INSTRUCTIONS

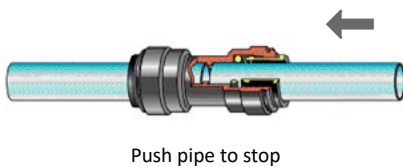

NOTE: Fittings and pipe should be kept clean, bagged and undamaged before use. DO NOT use hacksaw.

1

Cut the pipe square ensuring it is free of score marks. When using Speedfit BSPEX barrier pipe, cut along an insertion mark. We recommend the use of one of the John Guest pipe cutters. For soft or thin walled plastic pipe we recommend the use of a tube insert or pipe insert.

2

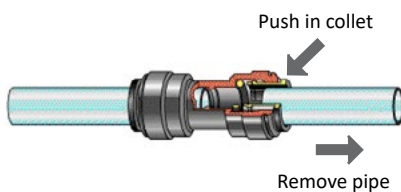

Push the pipe into the fitting, to the pipe stop. The collet (gripper) has stainless steel teeth which hold the pipe firmly in position whilst the 'O' ring provides a permanent leak proof seal.

3

Pull on the pipe to check it is secure. It is good practice to test the system prior to leaving site and/or before use.

4

Ensure system is depressurised before removing fittings. Push in the collet against the face of the fitting. With the collet held in position the pipe can be removed. The fitting can be reused.

LEAK STOPPER & FILTER LIFE MONITOR

LEAK STOPPER & FILTER LIFE MONITOR

Ultra-Sensitive Sensor

Quality Manufacture

Cartridge Maintenance

Your best defense against water damage...

Leak Stopper - When moisture is detected by the metal contacts the alarm is triggered and the unit activates the solenoid valve to shut off the water supply to the appliance. The Leak Warning indicator will continuously blink blue. The alarm will continue to sound until the unit is manually reset. After resolving the leak, press and hold the reset button for 4 seconds - the unit will then generate a long "beep" sound and reset the solenoid valve.

Filter Life Monitor - Have peace of mind knowing when to change your water filter cartridges. Depending on the life remaining within your filter cartridge the Cartridge Maintenance Indicator will signal a coloured light.

LEAK STOPPER & FILTER LIFE MONITOR

Item Code	Description	Unit Per Carton
IT002848	Leak Stopper	1

Labelled Components

- 1 Cartridge Maintenance Indicator
- 2 Leak Warning Indicator
- 3 Battery Life Indicator
- 4 Check/Reset Button
- 5 1.5m Cable
- 6 1/2" BSP Swivel Connector
- 7 Solenoid Shut-Off Valve

Specifications

Operating Voltage	9V DC Alkaline Battery
Connection	1/2" BSP Male & Female
Cable Length (cm)	150
Max. Pressure	approx. 125 PSI

- ◆ Endorsed by insurance companies worldwide.
- ◆ Leak control with alarm and auto shut-off
- ◆ Low battery power alert
- ◆ Colour coded lights indicating filter life status
- ◆ Easy installation and operation

Your First Defense against Leak Damage

Metal contacts on the unit's reverse side lay flush on the base of your undersink cupboard to sense the first signs of collecting water.
